

Managed Services & Information Technology

Managed Services

"Within a decade all businesses will outsource the bulk of their technology services ... ROI for companies that outsource is just over 300% with payback on investment in 121 days" Research from Morgan Stanley Dean Witter

NextGen concept of Network Management and Operations encompasses:

- Voice Networking (VoIP)
- New Technology Migration
- Storage, Back up and Restore
- COOP and Contingency Planning
- Fault and Security Management
- Network Monitoring and Administration
- Application Subscription
- Desktop Computing

Security and Compliance

Under a VAR agreement, our products and Services help our customers to comply with government and industry regulations, quickly identify and mitigate security risks before interruptions to business operations, implement and enforce Security policies & configurations, and finally Manage IT infrastructure with reduced operations expenditure.

NEXTGEN provides the most flexible and extensible solution in network security risk management space, helping our partners to control wide range of management and business functions from a single platform leading to improved operations, and enabling them to create new revenue streams through innovative managed services deployment.
